

Pipes Connect the Future.

Technical supply and project partner for industrial piping, energy plants and power generation.

Based in Austria. Supporting purchasing teams, EPC contractors, operators and industrial customers.

From individual components to coordinated project supply.

ROHRLINE combines material supply, drawing-based components and technical procurement. One contact coordinates specifications, sourcing, delivery and the agreed quality documentation.

PRODUCTS

Industrial piping systems

Pipes and tubes; flanges and fittings; valves and actuators; gaskets, seals, bolts and pipe supports.

POWER & CUSTOM PARTS

Drawing-based components

Boiler tubes and pressure parts; superheater coils; membrane walls; headers and manifolds; prefabricated spools and special fabrications.

Materials P235GH · P355NH / NL1 · 16Mo3 · 13CrMo4-5 · 10CrMo9-10 · P91 · Stainless steel · Duplex. P11 / P22, heat exchanger tubes and expansion joints: sourcing enquiries subject to confirmation.

Quality & international supply Applicable EN / DIN / ASME / ASTM specifications; EN 10204 3.1 documentation and agreed traceability. Project-specific tests, inspections, export documentation and staged deliveries can be coordinated. Direct and neutral shipping on enquiry.

Send your drawing, specification or bill of materials.
